

# QUALYS GUARD® ENTERPRISE

*“Ensuring maximum protection against the latest security threats of the day is a growing concern within our organization. The Qualys platform allows us to audit our security status at any moment and manage network vulnerabilities on a centralized enterprise-wide level with a fraction of the resources and cost.”*

Mark Iovinelli, Enterprise Design and Implementation Team Manager  
RR Donnelley

*“As a Web-based solution, QualysGuard enables us to perform security audits as often as necessary, spot vulnerabilities immediately as they are added to the QualysGuard database, and work proactively to remediate them. This helps us secure all of our network entry points, enforce ICI security policies and assists us meeting federal requirements.”*

Paul Simmonds, Director of Global Information Security  
ICI

**QualysGuard maintains a consistent false positive rate of less than 0.003%.**

QualysGuard Enterprise automates the entire process of vulnerability management—from network discovery and assessment to on-demand reporting, remediation tracking, and enforcement of security policies. The scalable Web service architecture of QualysGuard provides distributed security auditing inside and outside the enterprise perimeter.

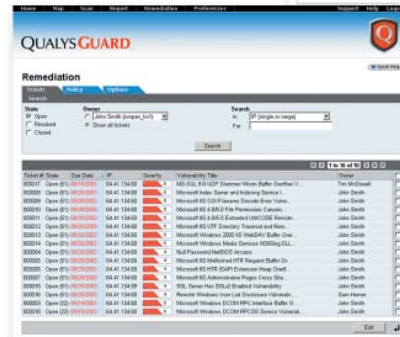

**QualysGuard Enterprise is ideal for large, distributed organizations with:**

- Thousands of servers and desktops
- Remote networks and multiple segments
- Many administrators needing controlled access to vulnerability and corrective action data
- Executives who require a consolidated view of the entire enterprise’s security status from a trusted, third-party source

QualysGuard Enterprise enables organizations to take control of their network security and confidently eliminate threats. QualysGuard Enterprise provides a best practice security approach to easily manage vulnerabilities and ensure remediation without incurring the burden or cost of deploying and maintaining complex software and hardware.

### Benefits of QualysGuard Enterprise:

- Scalable management based on the Qualys Web Services Architecture
- Fully-automated solution eliminates traditionally labor-intensive operations, saving time and simplifying large-scale vulnerability management
- Rapid identification and visualization of network assets
- Accurate vulnerability detection eliminates the time-consuming manual work of verifying results and consolidating data
- Accessible to authorized users from anywhere on the globe

## QualysGuard Enterprise Features:

### Accuracy

- Comprehensive vulnerability KnowledgeBase incorporates 3,500+ unique checks
- False positive rate of less than 0.003%
- Trusted, third-party certification of network security with tamper resistant audit trails
- Non-intrusive scanning techniques do not require host login credentials
- Inference-based scanning engine
- Internal and external scanning provides a 360-degree view of network vulnerabilities
- Scans configurable for optimum performance
- Fingerprints over 40 protocols

### Scalable Management

- Web service architecture allows users to scan globally without infrastructure costs
- Flexible asset grouping
- Remediation workflow management with automatic trouble ticket creation/assignment
- Multi-user environment with role-based access
- End-to-end encryption of vulnerability data
- Ticket policies allow users to control the generation of trouble tickets
- Add QualysGuard Scanner Appliances to test internal networks

QualysGuard Scanner Appliances deliver an easy-to-use scanning infrastructure for distributed networks that can be deployed in minutes.

### Centralized Vulnerability Management

- Centralized reporting from distributed scans
- Easily customizable reports for flexible reporting
- Automated trending and differential reports
- Remediation reporting: ticket trending and tickets by group, user and vulnerability
- Authorized user access from any location
- Reports export to HTML, MHT, and XML formats

### Automation

- Scheduling of scans and maps
- Automated daily updates to vulnerability KnowledgeBase
- Automated report generation
- Automated ticket generation and verification
- Correlates with Snort IDS using the open-source Qualys QuidScor engine to eliminate IDS false positives

### QualysGuard Enterprise Extended Feature Set

- Integrates with existing or legacy security management consoles (e.g. ArcSight, GuardedNet)
- Ability to create multiple Manager user accounts and unlimited number of user accounts
- SAS70 audited security architecture provides maximum data protection
- RSA SecurID two-factor authentication
- Extensible XML API
- Section 508 compliant

### Support/Maintenance

- 24x7 support
- All signature updates and feature enhancements are completed automatically, transparent to the user
- QualysGuard requires no additional maintenance or operating costs

### Pricing

QualysGuard's scalable Web services platform enables global enterprises to perform regular security audits and vulnerability management without the burden of deploying and maintaining a global infrastructure.

- Annual Subscription: Permits unlimited assessments of a predefined number of IP devices. Ideal for regular security assessments of network assets
- Per Scan: Permits flexible use of QualysGuard in environments with quarterly or periodic scanning requirements

All pricing is based on the number of IP devices scanned.

Nominated in three distinct categories, the QualysGuard® on-demand network security audit and vulnerability service was selected as the industry's Best Security Service.

The Computerworld Innovative Technology Awards distinguish vendors that are nominated by their customers for offering leading-edge products or services that provide measurable payback. QualysGuard was selected as the security award winner from a field of 350 nominations. All nominations came directly from Fortune 1,000 customers.

*"(QualysGuard) consistently identified the most potential exposures and identified the most serious problems, earning it our eWeek Labs Analyst's Choice Award...More important, QualysGuard Enterprise correctly profiled the systems and provided us with accurate reports that provided explanations of the problems and suggestions for making fixes."*
